

Instructor:

Kim Robinson

BSc, Grad Dip Manip Ther (Distinctions). Specialist Musculoskeletal Physiotherapist, Fellow of the Australian College of Physiotherapists, Adjunct Senior Teaching Fellow (Curtin University), Senior Teaching Fellow (The University of Western Australia), Accredited Mulligan Concept Teacher. Director Manual Concepts, Booragoon, Western Australia.

Kim Robinson has developed a reputation as a leading figure in manual therapy education. He was formerly a lecturer and clinical teacher on the Postgraduate Diploma in Manipulative Therapy programme at Curtin University of Technology for many years before establishing Manual Concepts. He now conducts a variety of lectures and clinical programmes around the world. Kim is an active member of the Australian Physiotherapy Association and the Musculoskeletal Physiotherapists Association of Australia. Kim is an internationally accredited teacher of the Mulligan Concept. His research interests and publications include manual diagnosis, cervicogenic headache, neck pain and the application of the Mulligan Concept. Visit www.manualconcepts.com for a list of his publications and conference presentations.

Kim has taught manual therapy in over 25 countries. These courses are well received by physiotherapists who have a wide range of backgrounds and manual therapy experience.

Mulligan Concept Manual Therapy Course

Mulligan Concept Upper & Lower Quadrant

These exciting two day clinical workshops will present in depth the unique concept developed and refined by internationally acclaimed New Zealand physiotherapist Brian Mulligan. This concept will provide your clinical practice with a stimulating new dimension, giving you an extensive array of treatment options to manage your client list. All the latest techniques, including Nags, Snags, PRPs and MWMs, for the spine, lower and upper extremity will be covered in these fully comprehensive programmes. The Upper Quadrant course includes the cervical spine, upper thoracic spine and upper limb. The Lower Quadrant course covers the lumbar spine, pelvis, and lower limb.

The latest edition of Brian Mulligans book, "Manual Therapy", now in its 6th edn forms the basis for these courses. So course participants can be assured of receiving the latest information regarding the concept. No previous experience of the Mulligan Concept is required to attend. Participants are given very close practical supervision to ensure high levels of competency and an understanding of technique application through clinical reasoning and patient demonstration.
