Myofascial Release has exploded on the therapeutic scene with an unprecedented impact and is recognized as the most effective form of healthcare therapy. This two days course will cover the basic as well as the advanced level techniques for the whole body.

Course Objectives:
1. Confidently describe and independently state the rationale for doing Myofascial Release and its specific effect.
2. Correctly demonstrate proper hand technique, grading of the level of touch, and the effects of a release.
3. Thoroughly comprehend the importance of fluid facial movement in a 3 dimensional system, allowing for the physiologic system to have the ability the provide resilience to dysfunction.
4. Describe the different layers of fascia and know when to treat each layer.
5. Explain and independently state how specific myofascial restrictions in different parts of the body can create the orthopedic dysfunctions that we treat on a daily basis.

Study Books, Certificates, Lunch and refreshments will be provided
